

GOOGLE MEET | UPDATE 10/2021

# HOST CONTROLS

## Host controls

LET EVERYONE

Share their screen

Send chat messages

Turn on their microphone

Turning this off might remove people using an outdated Meet app or non-Google meeting hardware. They can rejoin when it's turned on again.

Turn on their video

Turning this off might remove people using an outdated Meet app or non-Google meeting hardware. They can rejoin when it's turned on again.

[View all host settings](#)

As a meeting host or co-host, you can lock all participants' audio so they are muted and or lock all participants' cameras so no one can turn on their video. Click the icons below for more details or scan the QR code to read the latest blog post.

## IMPORTANT

When a host turns on Audio or Video Lock, mobile participants may be removed from the meeting if their device doesn't have:

- The most updated version of the Meet or Gmail app
- Android OS version M or newer
- iOS version 12 or newer

Once the Host turns off Video Lock, removed participants can rejoin.
